Skin: Likely

Ingestion: Likely

Eye Hazards - May cause slight to mild irritation of the eyes.

Skin Hazards - May cause slight to mild irritation of the skin. May be harmful if absorbed through the skin.

Ingestion Hazards - May be harmful if swallowed.

Inhalation Hazards - Irritating to mucous membranes and upper respiratory tract. May be harmful if inhaled.

Chronic/Carcinogenicity Effects - Long term exposure to silver and silver salts can lead to the condition known as argyria-a general gray pigmentation of the skin and mucous membranes.

Conditions Aggravated By Exposure - May cause argyria (a slate-gray or bluish discoloration of the skin and deep tissues due to the deposit of insoluble albuminate of silver). May be irritating to skin, eyes and respiratory tract.

Conditions Aggravated By Overexposure - To the best of our knowledge, the chemical, the physical, and toxicological properties of this compound have not been thoroughly investigated.
